REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the closest prior art of record is Merriam (US 5,322,530). Merriam teaches a process for preparing ecological coal wherein some of the combustible by-products are recycled back into the process system to power the dryer. The present invention is directed to a method for reducing energy costs during set periods in an ecological coal transformation process wherein the combustible by-products are stored under pressure and the energy demand of the process is monitored. When the process requires more energy, the stored combustible by-products are converted into energy to provide an additional source of energy for the ecological coal transformation process. Merriam does not teach or suggest such a method of reducing energy costs by storing the combustible by-products and using them when the energy demand reaches a predetermined value.

Accordingly, the invention as a whole would not have been obvious to one of ordinary skill in the art.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cephia D. Toomer whose telephone number is 571-272-1126. The examiner can normally be reached on Monday-Thursday.
